

# Chemical System Consulting

Australasian Institute of Dangerous Goods Consultants

## Transportation Training Services

*Consulting Engineers, Dangerous Goods Consultants (AIDGC), OHS&E Professionals for Dangerous Goods, & Technical Trainers*

### Course Description

This course provides participants with basic knowledge necessary for the packaging, consigning and loading of Dangerous Goods and other chemicals for transportation.

It is an intensive, practically oriented and interactive one day course.

The focus is on learning practical safe work practices using participants' workplaces, knowledge and case studies.

The course is developed to assist employers to fulfil their obligations under the relevant national and state / territory OH&S and Environmental legislation and statutory requirements.

### Course Objectives

At the completion of this course, participants should have an understanding of:

- ◆ Roles and responsibilities of the different people in the Dangerous Goods supply chain
- ◆ Where to find packaging requirements for Dangerous Goods transport
- ◆ Labelling requirements
- ◆ Information to be made available when planning the transportation
- ◆ Segregation techniques
- ◆ Safe loading

### Who Should Attend

All employees involved in the supply chain for dangerous goods, including packers, loaders and consigners. This course is NOT for drivers of vehicles carrying bulk dangerous goods.

### Venue

At your premises or a CSC training facility.

### Duration

5 to 6 hours. Times to suit including shiftwork.

### Class Size

Typically 10 to 12 participants.

### Cost

\$550 +GST per participant typically, however this varies depending on actual needs.

### Award

Certificate of Completion upon satisfactory attendance and completion of quiz.
