

H2O Rx

Sight Glass

The H2O Rx Series 5700 sight glass is designed to provide a **cost effective means of visually determining the level in a bulk chemical tank.**

The **glass sight tube** is protected by a **stainless steel frame** and clear facing of **impact resistant polycarbonate.**

The facing is calibrated for your convenience with a **metric height indication.**

For additional convenience the sight glass **can be used as a calibration column** using the metric rate scale.

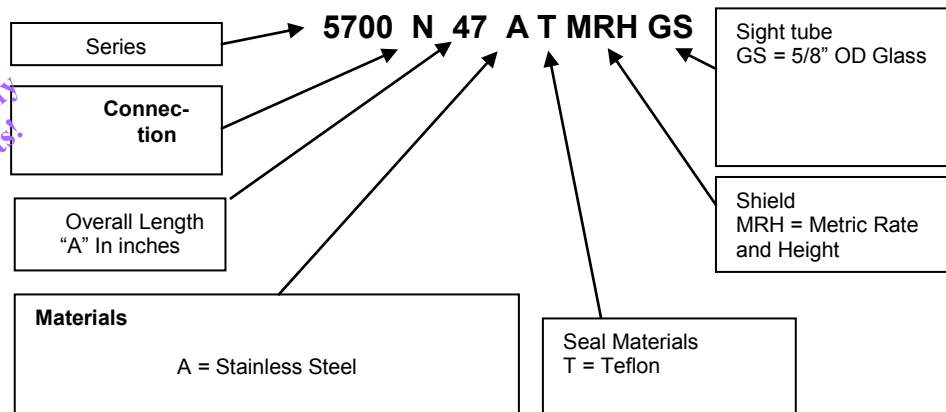

Connections are $\frac{1}{2}$ " **NPTM.**

Wetted materials are glass (for the sight tube) and either stainless steel or PVC wetted materials to provide flexibility with various chemicals. **Gaskets** are Teflon.

Special applications can be provided on request – these include **elevated temperature, high pressure and steam applications.**

Example Specification:

Ask us for a technical drawing to help specify your requirements!

The above part number is for a Series 5700 with $\frac{1}{2}$ " NPTM of 47" overall length and manufactured from Stainless Steel with Teflon seals, a metric rate and height scale with a 5/8"
